

# The Future Of Synthetic Grass Is Here.

## MEMORY FIBER™ YARN

ForeverLawn® Select Synthetic Grass features a unique Memory Fiber™ yarn that provides improved durability, outstanding resiliency, and remarkable realism.

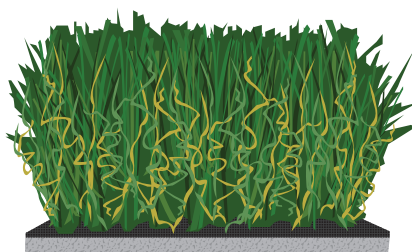

- Unique geometric shape provides greater resiliency.
- State-of-the-art resin resists fracturing and breakdown.
- Blade flexibility ensures sustained softness and extended longevity.

## UNIQUE CONSTRUCTION

The dense, durable construction of ForeverLawn® Select Synthetic Grass incorporates an innovative tan and green thatch zone. The dual colored textured grass provides several unique benefits.

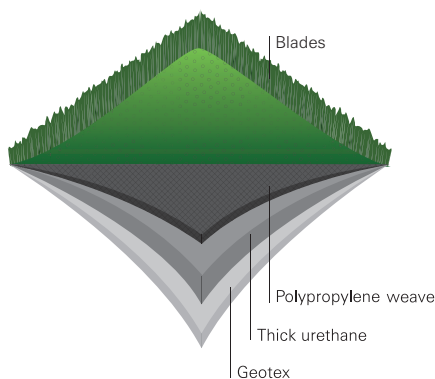

- Provides a natural, full appearance.
- Effective system for locking infill in place.
- Creates a more consistent surface.

## PREMIUM BACKING

ForeverLawn® Select Synthetic Grass is built on the most advanced, multilayered backing system available.

- Proprietary backing system provides incredible stability.
- Blades are encapsulated in backing for enhanced durability.
- Made with post-consumer recycled materials from Project Yellowstone.\*

Innovative Memory Fiber™ yarn offers exceptional resiliency.

Advanced technology resists fracturing and breakdown.

Innovative geometric shape for grass-like performance.

Unique construction and blades provide remarkable realism.

Textured thatch zone adds natural look, fullness, and consistency.

Proprietary multilayered backing system provides incredible stability and durability.

\*Project Yellowstone is an innovative recycling program with Yellowstone National Park and Universal Textile Technologies in which plastic bottles from the park are recycled and made into backings for premium carpet and artificial turf.
